Solutions materialized by Smart Minds”*

Products

“Keeping creativity and our founding principles at heart, we continue to break new ground in the field of software development”

P@ySmart.Net

Paysmart is simplified and end-to-end payroll software designed for companies across industry verticals. Paysmart is very flexible and follows a systematic approach thereby providing maximum stability and user customization and also minimizes the dependency on the vendor. It encompasses the entire gamut of HR activities thereby reducing a great deal of paper work involved in maintaining employee records.

HRe@se

Infoton offers you a complete Human Capital Management Solution, which includes the strategic decision-making tools needed by top-level management. HRe@se automates key business functions, allowing HR personnel to streamline processes, improve employee service, and become more proactive and receptive.

e-Competency Server

By continually expanding our expertise into new areas and striving for technology excellence, Infoton has developed a solution to match the output of your workforce with the organization goals. It helps the employees and the management to work in alignment with the organization objective.

Time Sheet

Were you waiting for a solution that would assist you in reducing excessive cost incurred in your business activities? Well, your wait is over now. Cost is crucial for all the organizations. Infoton brings to you a robust & cost-effective solution that intimates you to take remedial management action to encounter increasing cost of the project. Any company that bills for its services, or performs project-oriented work, or tracks absence for a professional workforce can benefit from Infoton Time Sheet.

Asset Manager

Asset Manager provides solutions that put state-of-the-art computing in the hands of the work force, meaning more productivity and flexibility. It provides professional management of your hardware and software assets throughout their lifecycle and keeps the organization connected to the asset information - giving it a greater reach than ever.

Products

Solutions at the click of the mouse

MFAMS

Infoton specializes in implementing a comprehensive solution that caters to Banks and Financial Institutions to simplify their core activities. MFAMS integrates various discrete data sources, automates the AMC processes and makes the operations more formalized and system driven. This leads to elimination of data inconsistency and better managed operational, financial and compliance risk.

IPO Manager

IPO Manager is a state-of-the-art solution that keeps a tab on the entire process of Book Building. IPO Manager is an integrated solution which collects, processes, shares information from across the centre, uploads it on real time basis to the connected Stock Exchanges and also helps in generating various analysis reports.

iCart

Have you been looking for a powerful, professional, cost effective shopping cart catalog system for a while? Look no further. iCart is a complete, powerful, professional shopping cart catalog system that will meet all your needs. Yet, it is so easy to use.

Helpdesk

It is very essential to have a Help Desk service in today's business world of increasing customer demands. Getting value for money is of essence in today's business scenario. Organizing customer support through a help desk saves money, improves customer satisfaction and enables effective management. Using and tuning Infoton's Help Desk is simple and intuitive and requires no training at all.

eCRM

eCRM is a comprehensive approach that provides seamless integration of people, process and technology and every area of business that touches the customer. Customer Relationship Management (CRM) is a business strategy that aims to understand, anticipate and manage the needs of an organization's current and potential customers. Information about customers and customer interactions can be entered, stored and accessed by employees in different company department with the help of this software.

IT Services

“We work with you to understand your challenges & objectives and customize projects by leveraging our technology expertise”

Application Development

In an environment where businesses are continuously changing and newer, better technologies and ways of using technologies are emerging, managing IT to keep in step with business, while leveraging existing assets, is one of the biggest challenges faced by organizations. Infoton uses up-to-date software development tools, the latest project management techniques and software engineering practices, thus maximizing return on investment and empowering organizations to stay competitive whatever the market conditions.

Content Management

Infoton develops content management platforms for content-intensive web-based applications, including subscription-based information services, employee intranets, partner or agent extranets, and portal sites. Our custom solutions support each client's unique business needs, workflow processes, and technical requirements, providing a foundation for effectively delivering and managing personalized content from multiple sources, formats and platforms.

Infrastructure Management

Infrastructure is the foundation on which a strong IT function is built. It is important not only to have the right infrastructure in place, but also manage the infrastructure well to get the best results. To make the right choices and manage the complexity well, it is important not only to have people with the right mix of skill and experience but also to deploy them effectively. You also need the right tools to manage your IT environment. Infoton offers you a complete package to single handedly manage your IT infrastructure.

Solutions for Financial Institution

Infoton offers a huge range of customized software solutions to the financial institutions to streamline their business processes and let the financial and banking professional focus on key areas. Infoton brings your way a scalable, flexible, and secure trade-processing platform for an Asset Management company, a solution to manage rules & compliances, evaluate holdings, manage real-time cash flows and an automated front office solution for Investment Managers.

IT Services

One Stop Shop for your diverse business needs

Application Support & Maintenance

Enterprises have significant investments in IT assets to execute their business and derive appropriate returns. It has been reported that in a software lifecycle, companies incur substantial cost into Support and Maintenance of software applications. Infoton designs and develops a software application, run it efficiently and provide end-to-end support and maintenance of the application. Infoton resorts to a 3-phased approach to Application Maintenance - Corrective Maintenance, Adaptive Maintenance and Preventive Maintenance.

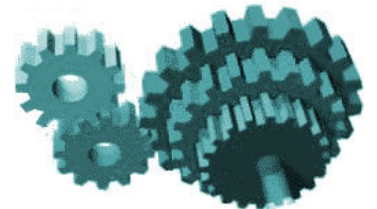

Websites & Portals

There is no perfect "one-size-fits-all" portal solution. Every company has its own individual needs, and implementing a portal solution poses multiple challenges. Infoton builds a Portal for companies to effectively streamline and integrate access to applications, documents, and Internet services through a single website for anyone to use anywhere. All the elements of our clients' corporate identity, including graphics, content, and multimedia, are seamlessly woven into their online presence, providing their users with a clear and consistent resource with which to interact.

Workflow engine

Today's increasingly competitive, expanding global marketplace requires that companies address rapidly changing market conditions in a more flexible and effective way than ever before. Workflow Engine helps in managing and executing modeled computer processes. Workflow Engine interprets events and acts on them according to the configured and defined processes and set parameters.

e-Business

Infoton specializes in implementing sophisticated e-business solutions for organizations and help them gain a competitive edge. Infoton can help you assess your needs and plan the necessary steps to transform your web site into an e-Success story.
